Following is a question that will allow Dr. James Opaluch the opportunity to make a presentation during the navigation session. Please send your rating of the question to Jay Meegoda ASAP. Thank you.

How should the need for a navigation channel in the Passaic River be analyzed?

Dear Mr. Basso, Dr. Mitra and Mr. Germann,

Enclosed file contains seven questions we received from the panel members and would require PowerPoint presentations. Would you please let me know your rating of either 1 (or yes to be included) or 0 (or no not to be included)? I am assuming you all will say yes to all as they are legitimate questions. If you agree a simple yes to all would be sufficient. Please send your reply before noon so that I could inform the authors to prepare slide presentations.

Thanks

Jay

P.S. I have not considered the possibility of one of you saying no to one or more questions. If that occurs, we may have to have a conference call to decide how to deal with that situation.
